Measurements from Measurer of home club must be presented for entry, but the Regatta Committee reserves the right to re-measure.

Any protest must be made in writing within one hour after finish of race.

Captains are requested to consult bulletin board before the scheduled time for races.

RACING RULES.

All boats to be measured by the official measurer of their home club.

The Regatta Committee is to be furnished with the rating of each boat at the time of entry.

All boats in a class will start at the same time and handicaps allowed by allowing time in the corrected time. The boat making the course in the least corrected time shall be declared the winner.

All boats shall be measured under the general 1914 rules of the American Power Boat Association, and, that there may not be any misunderstanding by club measurers, the rating is to be found by using the following formula:

$$18 \frac{3}{2} \frac{L. W. L. \times H. P.}{M. S.}$$

L. W. L.—Length of boat on water line when loaded for racing expressed in feet.

H. P.—Horse power when computed by following formula.

M. S.—Area of the midship section below water line expressed in square feet.

HORSE POWER.

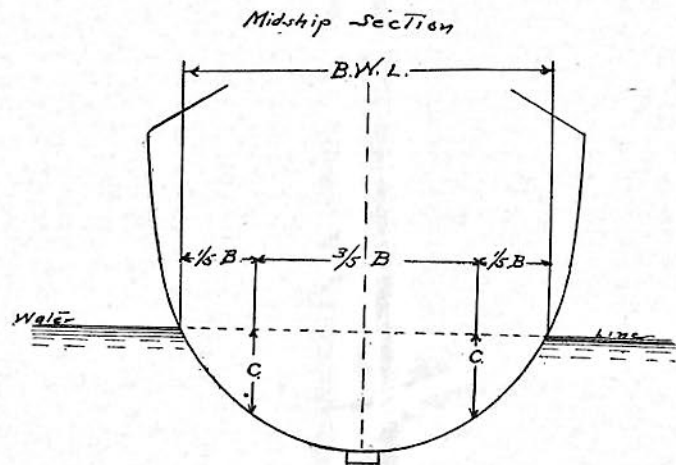

A. x N. x S. x C.=H. P.

A.=The area of one piston in square inches.

N.=Number of cylinders.

S.=Stroke in feet.

C.=Constant which is 66 2-3% for a four cycle motor and one for a two cycle motor in classes A, B, C and D, and in class E the constant shall be one for a four cycle motor and one and five tenths (1.5) for a two cycle motor.

MIDSHIP SECTION.

To be expressed in square feet, and is to be obtained as follows:—

With the boat in the same trim as when being measured for load water line length, take the beam (B) of the boat at the water surface at a point 55% from the forward end of the load water line, or at such a point as may be designated by the owner or his representative to the measurer as that of the greatest immersed transverse section. Divide B into five equal parts or stations, and at the first inboard station from either end measure perpendicular from the water surface down to the under side of the boat's planking (C). Then C multiplied by B will give the midship section.

POWER BOAT COMMITTEE.

Robt. L. J. Wagar, Chairman, S. Y. C., Sandusky, Ohio.

Com. Harry Holbrook, B. L. Y. C., Columbus, Ohio.

Com. Earl Shanteau, M. R. Y. C., Toledo, Ohio.

Members of all clubs in the association are urged to enter the contests. Entry blanks will be provided at association headquarters by members of the committee previous to the start of events scheduled. All entrants will be required to fill out entry blanks, committee reserving right to reject any entrant where sufficient grounds are shown.
